

Trimble Unity Route Navigator

INTEGRATED NAVIGATION FOR THE MOBILE WORKFORCE

The Trimble Unity Route Navigator is an add on subscription to the standard Trimble Unity annual user subscription, providing integrated, commercial grade turn-by-turn GPS navigation on the mobile worker's phone or tablet.

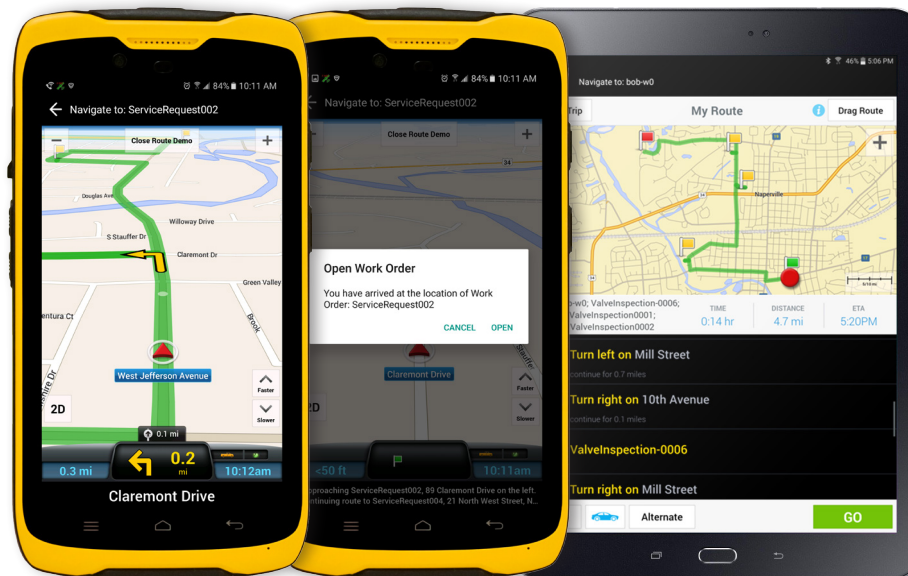

Using the internal GPS chipset and storing map data on-board, the Trimble Unity Route Navigator optimizes route calculation performance and reliability while removing any reliance on wireless data downloads for navigation

KEY FEATURES

- ▶ Clear 2D, 3D and Directions Only map guidance views
- ▶ Voice-guided, turn-by-turn directions with Text To Speech (TTS) street pronunciation
- ▶ Road lane assistance and real-sign information
- ▶ Optimized route to multiple job sites or assets
- ▶ On arrival notification with the capability to quickly open job details
- ▶ Up to three alternative routes
- ▶ On screen drag route facility
- ▶ Live traffic when connected to the internet

Benefits

- ▶ Reduces out-of-route mileage, typically by 5-10% per annum
- ▶ Improves customer service with accurate ETAs and smaller, precise time windows
- ▶ Improves field workforce efficiency
- ▶ Improve field workforce safety
- ▶ Rationalize hardware provision with a single, multi-function device
